 45° arc Order No. 206
 Tie-Brace Order No. 207

ACCESSORIES FOR STEERING

Panther Steering Rod Order No. 572
 Special Short Steering Rod Order No. 506

The FGV Mini-Panther offers two different steering rods. Even the most cramped spaces can be coped with by using the proper rod.

Steer-Out Order No. 523

ACCESSORIES FOR TRACKING

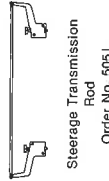

Mini-Panther Pneumatic Wheels Order Nr. 431

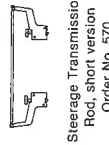

Mini-Panther Studio Wheels Order Nr. 430

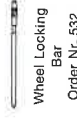

The Mini Panther comes with FGV Panther Kombiwheels, which are suitable for use on floor, straight or curved track. But the Mini Panther even offers additional options for floor movement. The Studio wheels are designed for use on smooth ground or carpeted floors, while the pneumatic tires suarantel even shots on rough ground. Of course, all wheels are easily interchangeable.

Steerage Transmission Rod Order No. 505L

Steerage Transmission Rod, short version Order No. 570

Wheel Locking Bar Order Nr. 532

Wheel Locking Bar, short version Order No. 571

By mounting the wheel locking bar, one can eliminate even the slightest deviation from a straight path for long tracking shots. By using the Steerage Transmission Rod, the Mini Panther can negotiate narrow curves and be steered through tight circles.

Side Locking Bar Order Nr. 506

The steerage transmission rod is also a great aid in wheel adjustment.

A SECURE PLATFORM FOR PERSONNEL AND EQUIPMENT

Panther Standing Platform, aluminium Order No. 508A

The Mini-Panther is designed to offer the maximum security in terms of balance and stability. Even the heaviest offset loads can be compensated for:

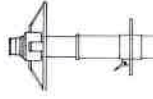

Counterbalance Rod for Panther Order No. 520

Counterweight 15 kg (33 Lbs) Order No. 121

THE COLUMNS

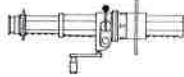

Column pedestal allows for smooth vertical movement in both directions at the touch of a finger. Perfect dampening of vibration and smooth starts and stops, but a few of its many features.

Mini Panther Magic Column Order No. 414

Mini Panther Turnstile Attachment Order No. 411

Mini Panther Cranked Column Order No. 413

Mini Panther Turnstile Attachment Order No. 411

The Cranked Column utilizes a smooth hand-crank for height adjustment. The two speed transmission allows for smooth transitions even while shooting.

FGV Turnstile Attachment Order No. 101

Mini Panther platform Order No. 410

With the FGV turnstile attachment, the Euro adapter is supplemented by two solid seat mounts for operator and assistant.

Center-Off, complete Order No. 422

Mini Panther platform Order No. 410

This combination is especially useful for the Lightweight Jib, making a lot of leeway for the camera operator.

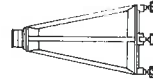

Euro-Adapter Mount Order No. 421

Mini Panther platform Order No. 410

With the Euro adapter mount, anything from fixed bazookas to the FGV Lightweight Jib can be mounted on the Mini Panther base.

Mini Panther Fix Column Order No. 412

If you only need a tracking base — for example for heavy cranes — and do not want to do without the advantages of the Mini Panther — you will be pleased about the new fixed column.

LOW RIG

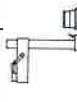

Mini Panther Low Rig Order No. 420

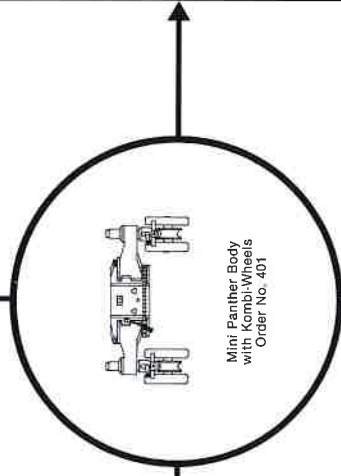

Tricky shots become easy when the camera can be precisely offset. The Mini-Panther's offset rigs, when combined with the Rotatable adapters, make positioning and repositioning the camera quick and simple.

Mini Panther Low Rig Order No. 420

Mini Low Rig Order No. 123

Mini Panther Body with Kombi-Wheels Order No. 401

SEAT EXTENSIONS, SEATS AND PLATFORMS

30 cm
Order No. 115

Panther Seat Circular
Order No. 109 R

Panther Seat Contour
Order No. 109

Running Board Platform
Order No. 513

Anchor Base for second seat
Order No. 507

All seat-extensions can be combined easily for operator comfort. Only the requisite number of connector pins are needed.

Connector Pin
Order No. 116

The Anchor-base for second seat allows operators and/or assistants to stand or sit on the Mini-Panther's wheel brackets.

BAZOOKAS

For high-angle shots, the Bazooka column extensions allow the camera to reach heights even beyond the range of the adjustable columns. All Bazookas are compatible among themselves and the columns, and can be easily locked together for greater camera heights. Pneumatic springs in the adjustable bazooka simplify height adjustment under loads.

20 cm
Order No. 102
50 cm

Order No. 106

OFFSET RIGS

The Mini-Panther allows extreme low-angle shooting by using the Low Rig, either in conjunction with a normal or inverted head. Any one of the following combinations will result in breathtaking low-angle photography.

Sidewinder Outrigger, adjustable/rotatable
Order No. 509 A

Short Outrigger, rotatable 40 cm
Order No. 509 B

U-Bangl
Order No. 534

Potatable Adapter
Order No. 530

THE LIGHTWEIGHT JIB

The Lightweight Jib's precise spindle counterbalancing system allows for quick counterbalancing, precise finetuning, and reduced bulk. No more than 4 counterweights are necessary. Jib reach can be extended with an adjustable sidewinder outrigger. With the Lightweight Jib's special Low Rig, the camera can even be placed below floor level.

FGV Lightweight Jib with weight rod

FIRM SUPPORT FOR EVERY CAMERA HEAD

3-way Leveller, Mitchell type
Order No. 118

Standard Ball Adapter
Order No. 107

Offset Ball Adapter
Order No. 108

To adapt for use of camera heads with a 100 mm ball mount:

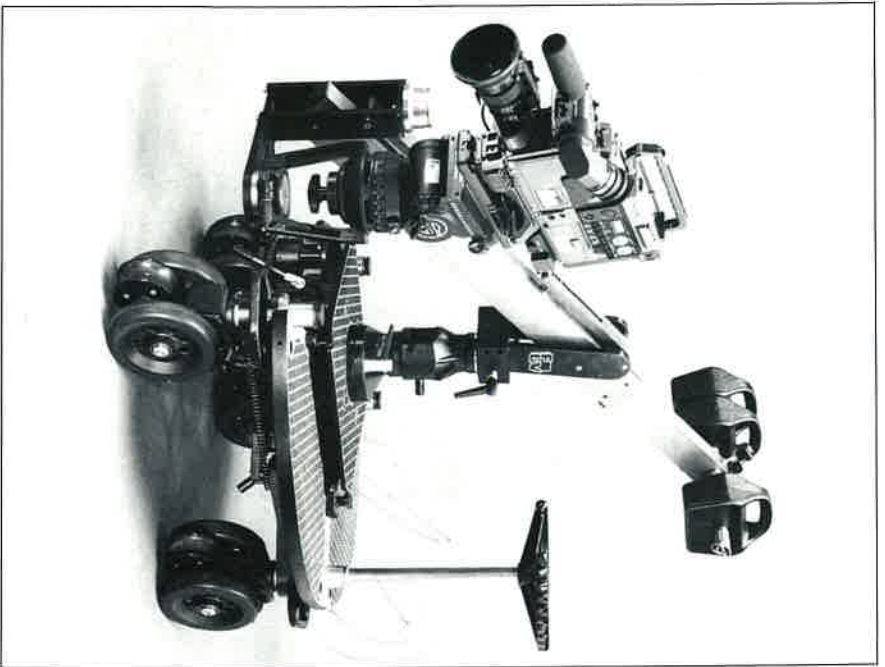

Adapter Converter, 35 to 16
Order No. 107 A

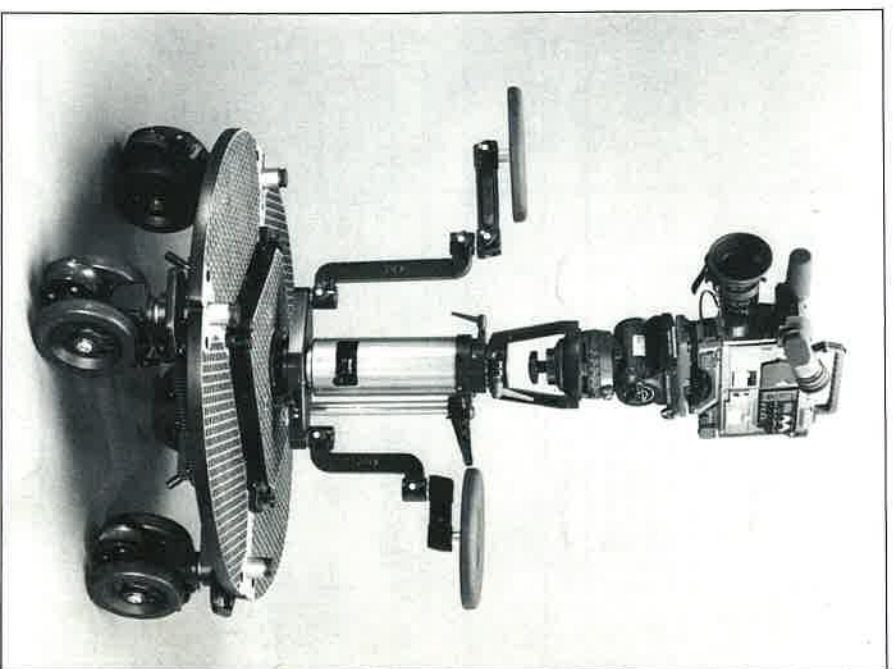

And to allow for minimum lens-to-ground distance, one can even invert a normal head and use the following:

Low Shot Plate
Order No. 119

The **FGV Mini Panther system** is a fully professional camera support system designed to combine minimum bulk with maximum versatility. Combined with its wide range of accessories, the Mini Panther is a powerful tool that can solve any shooting problem. Mini Panther technology ensures compatibility — all upgrades and accessories are easily and quickly installed. The Mini Panther is also compatible with the incredible array of accessories available for the FGV Super Panther. The options are simply up to the user. One can start small, big, or in-between, depending on one's needs — there is no unnecessary »ballast« in the Mini Panther program.
