

Presentation:

With the aim of improving safety and operational capacity, Servicevision presents this Ford converted into Camera Car with (own design).

Vehicle with double cab allowing everyone, except for the crane operator, to be comfortably seated indoors, with pre-installed monitors in each workstation and with the approved security systems.

On the outside, a wide and resistant platform allows the installation of our telescopic cranes with a high level of operation and safety for the operator and for the equipment.

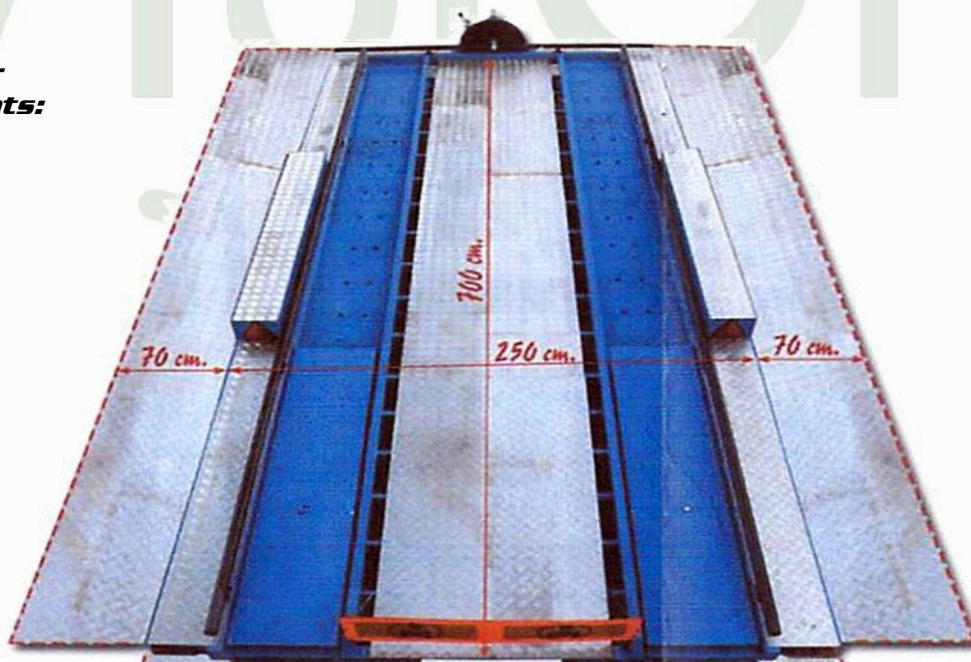

Vehicle with enough power that allows towing any kind of vehicle.

The use of batteries for powering the crane and the head is available. This is a breakthrough because you do not need to use a power generator, reducing noises, smoke and unexpected power changes.

Features:

- Brand: Ford
- Model: F350 Super Duty
- Overall Size: 7,60m long, 2,50m wide, 2,00m high
- Platform size: 2,50m wide and 3,50m long.
